Viadrinicum is an annual summer school devoted to the countries of the Eastern Partnership, and the larger context of Central and Eastern Europe. This year's edition is designed as a transsectoral Digital-Lab, aiming to explore social and political dimensions of digitalisation from multiple theoretical and methodological angles. With the help of academic seminars the school will allow its participants to critically engage with the notions of the digital self and the (post-)digital social, datafication and algorithmisation of life, as well as digital infrastructures and smart technologies.

Besides that, the participants will be able to enhance their practical and methodological skills in the framework of several project-oriented workshops.

Students, PhD candidates, young NGO activists and artists (up to 35 years of age) from all fields are invited to apply.

Programme and Organisation

Kirill Repin and Stefan Henkel
